

Exhibit A

OPIOID ABATEMENT STRATEGIES

PART ONE: TREATMENT

A. TREAT OPIOID USE DISORDER (OUD)

1. Expanding availability of treatment, including Medication-Assisted Treatment (MAT), for OUD and any co-occurring substance use or mental health issues.
2. Supportive housing, all forms of FDA-approved MAT, counseling, peer-support, recovery case management and residential treatment with access to medications for those who need it.
3. Treatment of mental health trauma issues that resulted from the traumatic experiences of the opioid user (e.g., violence, sexual assault, human trafficking) and for family members (e.g., surviving family members after an overdose or overdose fatality).
4. Expand telehealth to increase access to OUD treatment, including MAT, as well as counseling, psychiatric support, and other treatment and recovery support services.
5. Fellowships for addiction medicine specialists for direct patient care, instructors, and clinical research for treatments.
6. Scholarships for certified addiction counselors.
7. Clinicians to obtain training and a waiver under the federal Drug Addiction Treatment Act to prescribe MAT for OUD.
8. Training for health care providers, students, and other supporting professionals, such as peer recovery coaches/recovery outreach specialists, including but not limited to the following: Training relating to MAT and harm reduction.
9. Dissemination of accredited web-based training curricula, such as the American Academy of Addiction Psychiatry's Provider Clinical Support Service-Opioids web-based training curriculum and motivational interviewing.

10. Development and dissemination of new accredited curricula, such as the American Academy of Addiction Psychiatry's Provider Clinical Support Service Medication-Assisted Treatment.
11. Development of National Treatment Availability Clearinghouse – Fund development of a multistate/nationally accessible database whereby health care providers can list locations for currently available in-patient and out-patient OUD treatment services that are accessible on a real-time basis by persons who seek treatment.
12. Support and reimburse services that include the full American Society of Addiction Medicine (ASAM) continuum of care for OUD.
13. Improve oversight of Opioid Treatment Programs (OTPs) to assure evidence-informed practices such as adequate methadone dosing.

B. CONNECT PEOPLE WHO NEED HELP TO THE HELP THEY NEED (INTERVENTION)

1. Ensuring that health care providers are screening for OUD and other risk factors and know how to appropriately counsel and treat (or refer if necessary) a patient for OUD treatment.
2. Fund Screening, Brief Intervention and Referral to Treatment (SBIRT) programs to reduce the transition from use to disorders.
3. Training and long-term implementation of SBIRT in key systems (health, schools, colleges, criminal justice, and probation), with a focus on the late adolescence and young adulthood when transition from misuse to opioid disorder is most common.
4. Purchase automated versions of SBIRT and support ongoing costs of the technology.
5. Training for emergency room personnel treating opioid overdose patients on post-discharge planning, including community referrals for MAT, recovery case management and/or support services.
6. Support work of Emergency Medical Systems, including peer support specialists, to connect individuals to treatment or other appropriate services following an opioid overdose or other opioid-related adverse event.
7. Create school-based contacts who parents can engage with to seek immediate treatment services for their child.
8. Developing best practices on addressing OUD in the workplace.

9. State assistance programs for health care providers with OUD.
10. Engaging non-profits and faith community as a system to support outreach for treatment.

C. ADDRESS THE NEEDS OF CRIMINAL-JUSTICE-INVOLVED PERSONS

1. Address the needs of persons involved in the criminal justice system who have opioid use disorder (OUD) and any co-occurring substance use disorders or mental health (SUD/MH) issues.
2. Support pre-arrest diversion and deflection strategies for persons with OUD and any co-occurring SUD/MH issues, including established strategies such as:
 - a. Self-referral strategies such as the Angel Programs or the Police Assisted Addiction Recovery Initiative (PAARI);
 - b. Active outreach strategies such as the Drug Abuse Response Team (DART) model;
 - c. “Naloxone Plus” strategies, which work to ensure that individuals who have received Naloxone to reverse the effects of an overdose are then linked to treatment programs;
 - d. Officer prevention strategies, such as the Law Enforcement Assisted Diversion (LEAD) model; or
 - e. Officer intervention strategies such as the Leon County, Florida Adult Civil Citation Network.
3. Support pre-trial services that connect individuals with OUD and any co-occurring SUD/MH issues to evidence-informed treatment, including MAT, and related services.
4. Support treatment and recovery courts for persons with OUD and any co-occurring SUD/MH issues, but only if they provide referrals to evidence-informed treatment, including MAT.
5. Provide evidence-informed treatment, including MAT, recovery support, harm reduction, or other appropriate services to individuals with OUD and any co-occurring SUD/MH issues who are incarcerated, on probation, or on parole.
6. Provide evidence-informed treatment, including MAT, recovery support, harm reduction, or other appropriate re-entry services to individuals with OUD and any co-occurring SUD/MH issues who are leaving jail or prison or who have recently left jail or prison.

7. Support critical time interventions (CTI), particularly for individuals living with dual-diagnosis OUD/serious mental illness, and services for individuals who face immediate risks and service needs and risks upon release from correctional settings.

D. ADDRESS THE NEEDS OF WOMEN WHO ARE OR MAY BECOME PREGNANT

1. Evidence-informed treatment, including MAT, recovery, and prevention services for pregnant women or women who could become pregnant and have OUD.
2. Training for obstetricians and other healthcare personnel that work with pregnant women and their families regarding OUD treatment.
3. Other measures to address Neonatal Abstinence Syndrome, including prevention, care for addiction and education programs.
4. Child and family supports for parenting women with OUD.
5. Enhanced family supports and child care services for parents receiving treatment for OUD.

E. SUPPORT PEOPLE IN TREATMENT AND RECOVERY AND REDUCE STIGMA

1. The full continuum of care of recovery services for OUD and any co-occurring substance use or mental health issues, including supportive housing, residential treatment, medical detox services, peer support services and counseling, community navigators, case management, and connections to community-based services.
2. Identifying successful recovery programs such as physician, pilot, and college recovery programs, and providing support and technical assistance to increase the number and capacity of high-quality programs to help those in recovery.
3. Training and development of procedures for government staff to appropriately interact and provide social and other services to current and recovering opioid users, including reducing stigma.
4. Community-wide stigma reduction regarding treatment and support for persons with OUD, including reducing the stigma on effective treatment.
5. Engaging non-profits and faith community as a system to support family members in their efforts to manage the opioid user in the family.
